LUNCH & LEARN

An interactive and engaging learning experience for architects, designers and other industry professionals wishing to further their knowledge with the latest on trend design launches and product innovations.

Held at your place of work, or in our brand new Architectural Showroom, our knowledgeable team will offer a platform to experience ranges first hand. We offer technical support and guidance on slip resistance, LRV requirements and environmental standards, so you can be confident that you are well informed and working to the latest industry guidelines when specifying.

Did we mention we provide lunch?

Please contact your local Specification Manager to schedule a meeting.

WHO ARE WE?

With over 40 years of experience in the tile industry, Waxman Ceramics is a family-run company based in West Yorkshire. We are the largest supplier of mosaics in one of the leading providers of wall and floor tiles to the specification market.

We have an extensive portfolio of ceramic and porcelain tiles, and can provide solutions suitable for every project and sector, no matter how big or small your project may be.

At Waxman Ceramics we have a great passion for design and are always looking to discover new and creative surfaces or innovative technologies thanks to our long-standing relationships with some of the world's most reputable manufacturers.

Understanding the needs of each project is important to us and our dedicated specification team work across the UK to provide technical and specialist support to assist architects and designers from that initial concept right through to projection completion.

PROTECTING THE ENVIRONMENT

Here at Waxman Ceramics we are driven to reduce our impact on the environment and are always looking at how we operate with a view to reducing our carbon footprint. Our offices are powered using the latest in solar technology provided by our sister company Waxman Energy, with EV chargers readily available on site to power our fleet of electric cars.

Our Architectural sample packaging is completely eco-friendly and 100% recyclable.

When sourcing collections to add to our portfolio, we are in partnership with leading manufacturers from across the globe who are continuously working to develop products that demonstrate a reduced impact to the environment.

The following icons you will see located throughout the brochure highlights that environmental drive!

DECORATIVE

Decorative tiles are an artistic and functional option for enhancing interior and exterior spaces. Typically made from ceramic, porcelain, or glass, these tiles feature intricate patterns, textures, or colours that add visual interest to walls, backsplashes, and floors. Available in various shapes, such as squares, hexagons, or mosaics, they are commonly used in kitchens, bathrooms, and feature walls to create focal points or accents.

NEW
BURANO

Burano combines art and functionality, with tiles that transform spaces into unique masterpieces. Its vibrant colour palette offers endless creative possibilities, giving each space a distinct and exclusive character.

STONE

Stone tiles provide a timeless, organic look, with each tile featuring unique patterns and veining. Available in multiple sizes, they suit a variety of design styles, from rustic to contemporary. They are particularly favoured for high-traffic areas like kitchens, hallways, and bathrooms due to their robustness and natural beauty.

MARBLES

Our marble effect ceramic and porcelain tile collections take inspiration from the various marbles discovered around the world. Each collection is unique with the different finishes and innovative technologies.

Technological advances now allow for the replication of sedimentary rock veining. Marmora combines design and technical precision, with streaks and colour contrasts that mimic natural marble.

Everything started for Théophile Winckelmans in 1894 when he opened an unglazed tile factory in Lomme in Northern France.

Five generations have followed since then, sustaining the legacy and know-how of the founder whilst meeting the challenges specific to each era: the World Wars and bombing of the factory along with globalisation and the need to open up to export are some of the challenges successfully overcome which have allowed the factory to remain on its original site for so many years.

After the opening up to the world and rapid development of exports initiated by Jacques Winckelmans in the 1990s, the beginning of the 2000s was a difficult time for the factory which had to make some radical changes. The fifth generation currently at the helm thus decided on a major change of gear, with major investment in production and a move upmarket for the product. Our company has now achieved global recognition for the quality of its tiles and gained the trust of prestigious names in such diverse fields as haute couture and restoration as well as of known personalities.

Today, it is Barbara, Jacques daughter, who is carrying on with the legacy of the product and maintaining the family values that are key to the survival of our tiles.

A Natural and Authentic Product

Our fully vitrified unglazed fine tiles are made of natural materials (mainly clay) from France and Europe which produce a non-porous tile, the ideal, versatile product for all types of residential, commercial and industrial projects.

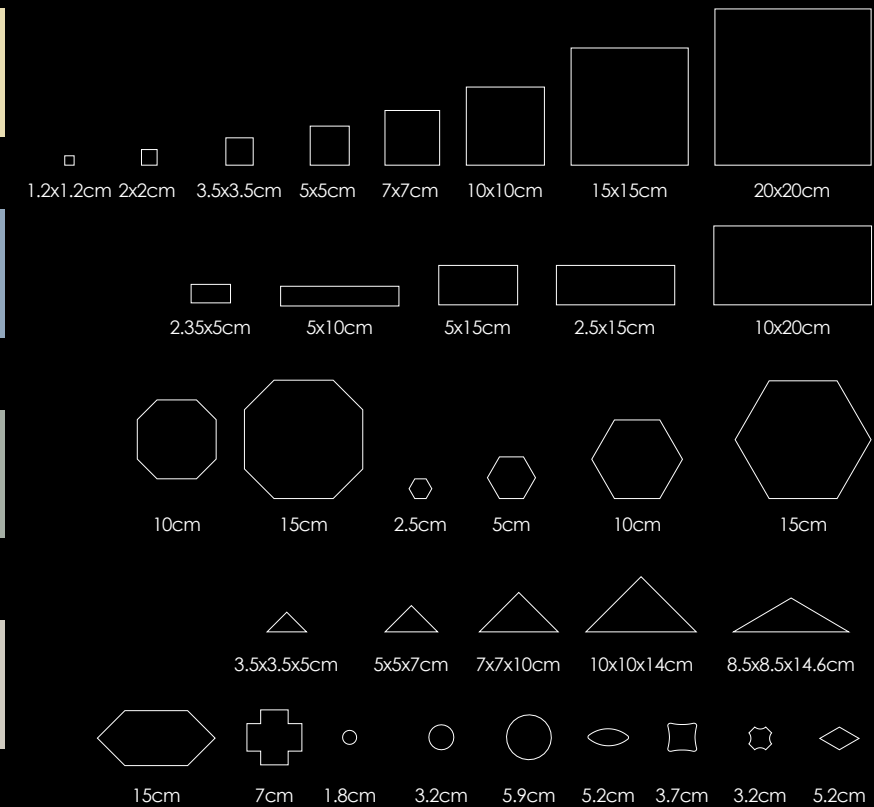

Easy maintenance and excellent stain resistance thanks to near-zero porosity. The absorption rate of under 0.5% of our fully vitrified tiles makes them stain-resistant and they can therefore be used in the dampest locations with no fear of them changing colour or appearance. This low porosity makes them easy to clean and renders any post-installation treatment or specific cleaning products superfluous. They can be used in such varied projects as professional kitchens, public swimming pools and so on.

Through-body colours and patterns

Our tiles are through-body, which gives them an identical colour throughout their thickness and a service life of several centuries thanks to the lasting shades and patterns.

A lasting, versatile product thanks to its exceptional technical characteristics. Fired at a temperature close to 1,200 degrees Celsius, our unglazed tiles are compact and have excellent technical characteristics. They are robust enough to be used commonly outside, they are heat- and frost-resistant and suitable for intensive use areas.

DESIGNS & BORDERS

Designer Range

Packaging

All our floor designs and borders are supplied pre-assembled on sheets of about 30x30 cm for easy installation. Caution, floor designs and borders are supplied separately so any border can be used with your choice of floor design.

Joints

Floor designs and borders assembled edge to edge and supplied without joint. Some floor designs have an alternative version with standard joints. Please ask for further information.

Models

Some borders are presented with plain squares around them which are used here for aesthetic purposes only.
